Professional Experience - 6.9+ years

Google india

Software Development Engineer-3 Dec-2024 - now Tech Stack : java-17/21, fig, Silkroads, shell, Rapid

- Architecting data center orchestration workflows for Google Cloud, including upgrades, Moves, and decoms (PIE).
- Spearheading critical DC initiatives such as RackMoves, NPIs, and system upgrades.
- Mentoring and technical guidance for both onboarding and established team members.
- Transitioned infrastructure from a centralized HoistDB architecture to decoupled, individualistic databases.
- Technical Excellence and Process Optimization: Spearheaded multiple initiatives to enhance system performance and decrease turnaround times; authored comprehensive ITS tests for various operational workflows.
- Integrating AI-driven development into daily operations via CiderAgent, NotebookLM for document parsing, and automated agents for unit tests and ticket resolution.

Grl technology

Senior software engineer Aug-2023 - Dec 2024 Tech stack: c/c++ 14/ c++17, wireshark, gitlab, power management, windows-development, RTOS, linux

- Contributed to the open-source Wireshark project by developing a dissector for the Thread protocol.
- Architected and implemented an object-oriented C2V visualization module, focusing on DisplayPort driver design.
- Engineered audio programming components for specialized DisplayPort testing solutions.
- Utilized the QT6 framework to build robust desktop applications.
- Developed Type-C power management drivers and enhanced system efficiency by optimizing control flow logic.

Tracxn Technology Bangalore

Senior software developer jan-2023- apr 2023 Tech stack: ELK, MongoDB, java, postman, AWS, Apache Kafka, spring boot, git ● Groovy to Java migration of codebase , debugging and fixing the bugs in the codebase.

- API creation and management, and ownership of specific modules.

Samsung Research and Development Institute India, Bangalore Oct-2019

-July 2022

Senior software developer,

Tech Stack: C++, microservices, Linux, Wireshark, perforce, GDB, RedisDB, GoogleCloud,

Makefile creation, cmake

Responsibilities

- Development of upgrade features and customer-specific requirements in regular package updates for 4g/ 5g customers all in C++with a Linux environment(Embedded software).
- Development of containerized-platform for mobility management entity(Linux) in a 4g system allowing it to be extremely scalable over cloud infrastructure.
- Since the code was developed in a Linux environment, I have good knowledge of development on remote servers.
- Received a spot award for automating the task and following agile-based software development.

Tripstack India, Pune Aug 2018 -Oct 2019 Web Developer

Tech-stack: C#, postman, chrome, Visual Studio, Apache Kafka, GitLab

Responsibilities

- Developing a code that scrapes airline websites to gather info about every flight on the airline websites. (web Crawlers)

Project: Skynet

Responsibilities :

- Decrypting code that detects humans and machines apart from each other and developing solutions to bypass that.

Education

1. Bachelor's Degree (Bachelor of Engineering)- Information Technology MIT,pune 2014-2018
2. HSC, Vande Mataram Vidyalaya, Nagpur 2012-2014
3. SSC, Pandit Bacharaj Vyas Vidyalaya 2002-2012
